### **Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

1)  Responsive to communication(s) filed on 28 May 2002.

2a)  This action is **FINAL**.                    2b)  This action is non-final.

3)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 1, “using a cylindrical cam” is vague since it can not be determined if the assist device is positively claiming the cam, functionally reciting the cam, or if the cam is part of the device. The cam is not connected to any other element in claim 1, but claim 2 uses a cam and claim 5 has a guiding piece fixed to the cam. The examiner has interpreted the claim as not containing the cam since it is not connected to any other element in claim 1 and the claim should be amended accordingly. It is suggested to delete “using a cylindrical cam” in line 1 (and in the dependent claim preambles). In addition, “a sac” is vague since it can not be determined if this is the same blood sac or a different sac (it is suggested to use “the sac”). In addition, “itself” is vague since the word does not specifically state what element “itself” refers to.

In claim 2, “its” is vague. In addition, “a cylindrical cam” is vague since it can not be determined if this is the same cam listed in claim 1, line 1, or a different cam.

In claim 5, “the rear cover” lacks antecedent basis. In addition, “the cylindrical cam...a linearly reciprocating motion” is vague since claim 1 has not positively recited the cam or its linearly reciprocating motion. It is suggested to depend claim 5 from claim 2 since claim 2 uses the cover and cam, and cancel claim 6 since it is nearly identical to claim 5.

In claims 7 and 8, “the outer circumferential surface” lacks antecedent basis.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chareire et al (4822356). Chareire shows sac, 26 and 27, pusher plate, 24/25, with guiding axle, both 44, and guiding piece as lower part of 44 connected with 40.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyata (5041132). Miyata shows chamber 7, 8, 10, sac, 1 and 2, and pusher plate, 3, with guiding axle, 20, and guiding piece as 51, 52, or 30, or vertical section of element 20.

***Allowable Subject Matter***

Claims 2-4, 6, and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Claim 7 is too vague to determine if it is allowable since it depends from claim 5.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George R. Evanisko whose telephone number is 571 272 4945. The examiner can normally be reached on M-F 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 571 272 4955. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
